MANIPULATORS HOLDING THE SENATE.

Evidences of the damaging effect upon American edit of the disgraceful legislative incompetency of Democratic party in Washington multiply daily. repear distrust, according to advices received by n bankers here, is steadily increasing, and in quence of the withdrawal of foreign balances renewed selling of American securities by a holders the country is now threatened renewal of exports of gold on a large scale. The foreign exchange markets were strong yes terday at the full figures of the week, and this reity of bills of exchange renders it certain that lay remittances abroad must be covered by shipments of the precious metal. The most conservalve estimates made by careful bankers place the exports by the French and German steamers on Saurday at \$4,000,000. It is even considered possible that the amount may rise to \$5,000,000, which would the largest amount that shippers carto trust to the available ocean steamers. It is feared nat next week will witness a still larger efflux, ad well-informed financial men do not hesitate to that the indications point to a sustained moveent the proportions of which may not be meas-

A WEEK'S LOSS OF CONFIDENCE.

The loss of foreign confidence, it is said, in banking circles has been distinctly noted in the last week. For menths the National Treasury has been paintaining its gold reserve only by desperate appaintaining is kell related only by desperate appears to the New-York banks, made, however, in a roundabout, underhand fashion. The threat of coming the silver seignlorage was used to draw capital into the \$50,000,000 5 per cent loan last February. Several weeks ago the Treasury secured \$5. 20,000 gold from the banks on the plea that it would tide over the National finances until Congress passed a tariff bill which would solve the financial problem. It was even intimated to the New-York anks that if help was given to the Treasury and criticism of Secretary Carlisle suspended, the Adunistration would, when the Tariff bill was out of the way, make another large bond issue to reish the gold reserve.

In spite of all the assistance given by the bankers of the metropolis the Treasury's gold balance has gradually wasted away until now it is only a more than \$50,500,000. Instead of a settlement of the tariff question, the two Houses of Congress have engaged in a hopeless dispute, and President Cleveland has added to the complications of the situation by his attack on the Senators of his own party. Disgust at the indifference shown by Congress to the strike of the Treasury has increased in Europe, and the list exhibition of incapacity and impotency has given a severe blow to foreign con-Under the circumstances the bankers of New-York feel that they can extend no more gratuitous assistance to a Treasury management that has shown incompetency and irresolution, but must give the first regard to the protection of their depositors and their shareholders. If the Secretary-ship of the Treasury was filled by a financier in ship of the Treasny was the whom the business community possessed conflictive it would be expected that the chief dinancial officer of the Government would leave his party to fight out their factional quarrels alone, and would come to the head centre of capital of the country for advice as to the best method of meeting the situation. But no banker expects Mr. Capitale to take such a

SUGAR GOES UP A POINT.

The Sugar al of De is lest to be a proof that the influence of the trans-his gone higher than the upper house of Congress. There is every prospect that the monopoly of the Havemeyers will be saddled upon the people unless proof of speculative and corrupt bargains is brought out so strongly that an indignant uprising of the Nation will overwhelm the abhorrent conspiracy.

COAL AND TRON "DEALS."

Renewed attention is being given in Wall Street to the motives back of the President's recent frantic Canadian coal syndicate was to be liberally recom-Mr. Celeveland in 1892. The Presidential solicitude for free coal was shown to be the result of political colligations to be paid off at the expense of American labor and capital. The evidence of the "deni" teres free iron-ore is fully as strong in all its circumstantiality. The Bethleisem Iron Company and the Pennsylvania Steel Company, of Pennsylvania, are said by well-informed men in the Iron trade to be the owners of the Cuban fron mines, that would reap the benefit of the programme which Mr. Cieve and is trying to force upon the sugar-stained Senar. These mines are extensive and rich, and under the free dimines of ore could be developed rapidly. Aready the ore is, in spite of existing duty, coming into the American market. The plea of Mr. Cieve land for free iron-ore seems to come as an after-thought of his, but there is every indication that the idea was hatched before the election. The Mary and Steel Company works at Sparrow Point, Mia Steel Company works at Sparrow Point, Mia Steel Company several years ago. When the faction of 182 came well-informed men say that this company and the Bethlehem fron Company threw their influence for Mr. Cieveland. Whether all of the managers of these concerns were Lemocrats originally or not matters little. They all became Themography or the concerns were lemocrats for revenue after the ownership of the mines in Caha had been secured, and for the mines in Caha had been secured; and for the mines in Caha had been secured; and for the mines in Caha had been secured; and for the mines in Caha had been secured; and for the mines in Caha had been secured; and for the mines in Caha had been secured; and for the mines in Caha had been secured; and for the mines in Caha had been secured; and for the mines in Caha had been secured; and for the mines in Caha had been secured; and for the mines in Caha had been secured; and for the mines in Caha had been secured; and for the mines in Caha had been secured; and for the mines in Caha had been secured; and for the mines in Caha had been secured; and for the mines in Caha had been secured; and for the mines in Caha had been secured; and fo obligations to be paid off at the expense of Ameriall of the managers of these concerns were Demo-crats originally or not matters little. panes or thousands of American laborers suffered crost.

This Democratic iron "combine" faught alongside of the Whitney Coal Trust and the bloated Sugar Trust for the success of the Free Trade party at the last election. Slow as the President or Congress has been in carrying out the ante-election deals, it is now plain that, reckless of the prosperity of the country, heedless of the insecure position of the Salonal Trassury, all legitimate interests are to be sacrificed until, after various legislative manipulations, the final scheme of "Tariff Reform all emerge from Congress under the favor of the President, with millions of profits handed over to a Democratle trinity of sugar, coal and from monopolies.

This section shall not be held to repeal or modify any existing laws by virtue of which pension funds have been created in any municipality, but there shall be no appropriation of puble moneys, or of moneys raised by taxation, for the benefit of such funds, to any greater extent than is now authorized by such laws.

The convention has already debated this amendment and has shown that it approves the principle of abolishing pensions. The chief persons who will be affected by it will be the judges of the Court of Appeals and the judges of the Court of Appeals and the judges of the Supreme Court. Those who are now entitled to pensions, or those now serving who will be so entitled as soon as they reach the age of seventy years, will not be affected, however. A report of the State Controller shows that the system of pensioning judges, even if abolished now, will have cost the State Society.
